

Some municipalities use inspection agencies for enforcement of Uniform Dwelling Code

Someone building a one- or two-family dwelling in one of about 165 Wisconsin communities should be reminded that they will need to contact a registered Uniform Dwelling Inspection Agency in advance of construction to arrange enforcement of the Uniform Dwelling Code (UDC).

Enforcement of the UDC, which is the Wisconsin statewide code governing one- and two-family dwellings built since June 1, 1980, includes issuing building permits, doing plan reviews, performing inspections, and other code-required functions.

Following state legislation in 1999, these local municipal boards or councils made decisions that placed the state Department of Commerce in charge of enforcing the UDC in the municipality. The department, through its Safety and Buildings

Division, set up a system of registering private inspection agencies to provide owners with the required UDC inspections.

Lists of registered UDC inspection agencies are available from participating municipalities and are on the Safety and Buildings WebSite, <http://www.commerce.state.wi.us/SB/SB-OneAndTwoFamilyProgram.html>. All UDC inspection agencies have identifying state registration cards.

For more information, contact Larry Swaziek, Safety and Buildings Division One- and Two-Family Dwelling Program Manager, 608-267-7701, Lswaziek@commerce.state.wi.us.

List of communities using UDC
Inspection Agencies begins on page 8

Wisconsin Construction Codes Report, May 2003

WCCR free on the Internet, <http://www.commerce.state.wi.us/SB/SB-DivPublications.html>

the *WCCR* courtesy of the Environmental
and Regulatory Services Division.

As of July 1, 2003, paper copies of the *Wisconsin Construction Codes Report* will not be sent out free of charge

Stormwater subsurface infiltration needs plan review

When stormwater, surface water, groundwater, or clear water wastes are dispersed from a plumbing system by means of subsurface discharge, plans must be submitted to the Safety and Buildings Division for review. This requirement is in Comm 82.36(3)(b)1.

Electrical, Plumbing, UDC revisions adopted, exams will change

Code revisions to Comm 16, Electrical Code, Comm 20-25, Uniform Dwelling Code, and Comm 81-84, Plumbing Code, were adopted by the Department of Commerce in late February.

Credential exam questions this spring and summer will be based on the code version in effect on the day of the exam.

The plumbing and electrical revisions are expected to be effective May 1, 2003, and the UDC revisions on August 1. The actual dates depend upon legal publishing dates.

Electronic copies of the revisions, or new official code text (after the effective date) are on the S&B WebSite, <http://www.commerce.state.wi.us/SB/SB-DivCodesListing2003.html>.

You may check the status of a credential on the S&B WebSite,

<http://www.commerce.state.wi.us/SB/SB-CredentialStatusCheck.html>.

Wisconsin Construction Codes Report

The WCCR is a monthly publication of the Safety and Buildings Division, Wisconsin Department of Commerce, delivered to about 13,000 readers - people who hold S&B plumbing, POWTS, and fire sprinkler credentials, to local inspectors, and to fire departments. For a year's subscription, send \$20 to S&B Material Orders, PO Box 2509, Madison, 53701. Be sure to provide return mail info and note what you are ordering. WCCR on the WebSite: <http://www.commerce.state.wi.us/SB/SB-DivPublications.html>.

What is required to be submitted?

A complete listing of the technical information to be submitted can be found on the S&B website, <http://www.commerce.state.wi.us/SB/SB-PlumbingDatabaseReport82363.html>.

Plan submittal also includes the completed plan approval application form (SBD-6154), a minimum of two sets of drawings showing the complete system, and a \$100 review fee. There is an additional fee of \$10 per inch diameter of the storm/clearwater drain line (see Comm Table 2.64-1, Fee Code).

Currently there are three S&B offices where plumbing stormwater infiltration plans are reviewed: Hayward, LaCrosse, and Green Bay. The reviewers' names and phone numbers are:

Tom Devereaux – Hayward – 715-634-3026

Herman Delfosse – LaCrosse – 608-789-5535

Wes Grube – Green Bay – 920-492-5613

Plans involving subsurface dispersal may include other plumbing such as sanitary drain and vent piping, water supply, and storm drain systems. The complete plumbing system may be submitted to the reviewers shown.

Questions involving these types of submittals can be directed to any S&B plumbing plan reviewer, listed on page 10 of this *WCCR*.

There will not be any printed copies of the **Wisconsin Plumbing Products Register** mailed this spring due to budget constraints. The *WPPR* is on the S&B WebSite, <http://www.commerce.state.wi.us/SB/SB-PubsPlumbingProductsRegister.html>

Air admittance valves should not serve sanitary sumps

Currently there are two manufacturers of air admittance valves that are approved for use in Wisconsin; Oatey and Studor.

Both approvals include numerous limitations. Recently, Safety and Buildings Division staff have been notified of improper installation of air admittance valves. Specifically, the reports are that the valves have been installed to serve sanitary sumps. No the valves have been approved for that purpose due to positive pressure that can exist in the pumps.

The air admittance valve limitations, along with all product approvals and conditions, can be found in the *Wisconsin Plumbing Product Register*, <http://www.commerce.state.wi.us/SB/SB-PubsPlumbingProductsRegister.html>.

If you have any questions about the use of air admittance valves or other general plumbing products, you can contact any plumbing plan reviewer listed on page 10 of this *WCCR*.

Fire Sprinkler Ed

A 4-day "Inspection, Testing and Maintenance of Water-Based Fire Protection Systems" seminar has been scheduled for May 20-23, 2003, at the Northeast Wisconsin Technical College in Marinette. The program consists of two days of "Plan Review and Inspection," one day of "Fire Pumps," and one day of "Inspection, Testing and Maintenance." For registration information contact Bill Ewing of NWTC, 920- 498-5603.

Q&A about the Wisconsin Commercial Building Code is on the S&B WebSite

<http://www.commerce.state.wi.us/SB/SB-CommercialBuildingsCodeAdoptionQuestions.html>

You may now search S&B computer records for Cross Connection Control Device information. See the plumbing program page, <http://www.commerce.state.wi.us/SB/SB-PlumbingProgram.html>

You will find the 2003 S&B credential exam schedule on the Internet: <http://www.commerce.state.wi.us/SB/SB-CredentialExams2003.html>

Contact information for plan review

To schedule an appointment (commercial/multifamily buildings, pools, or plumbing):

- S&B WebSite (buildings only):
<http://www.commerce.state.wi.us/SB/SB-DivScheduling.html>
- Fax: 24 hr. toll-free number for appointment scheduling, 877-840-9172
- Email: planschedule@commerce.state.wi.us

For application forms:

- On the S&B WebSite (choose "Forms" on left of screen): <http://www.commerce.state.wi.us/SB/SB-DivForms.html>
- Call any of the offices listed on page 10

Info about next available review

appointment: ▪ <http://www.commerce.state.wi.us/SB/SB-DivDailyDoc.html>

Info about status of plan review:

Hancor EnviroChamber models differ for POWTS design

by Mike Beckwith, Plumbing Products Reviewer, 608-266-6742, mbeckwith@commerce.state.wi.us

There are differences between the two Hancor Hi-Capacity EnviroChamber Unit models when it comes to designing POWTS dispersal/treatment systems.

One model is approved for use in Wisconsin as “HI CAPACITY 138-gallon capacity” and the other is approved as “HI CAPACITY 135-gallon capacity.”

Specifications for the HI CAPACITY 138-gallon are EISA 30.7 sq.ft. per chamber; laying length 6.13 ft; width 34 inches; height 17.5 inches; and the open bottom area 15.9 sq. ft. per chamber.

Specifications for the HI CAPACITY 135-gallon are EISA 31.05 sq.ft. per chamber; laying length 6.21 ft; width 33.5 inches; height 18 inches; and the open bottom area 16.15 sq. ft. per chamber.

Hancor has stopped producing the 138-gallon capacity model. However, those in stock are still approved for sale and use.

Shallow post foundation alternate standard approved

An alternate standard for shallow post foundation design, ANSI/ASAE EP486.1 OCT00, has been approved for use, with limitations, in lieu of the allowable load bearing values of soils of IBC Section 1804, and is considered an acceptable standard of design for IBC Section 2306.1. For details see the approval evaluation, 200271-A, <http://www.commerce.state.wi.us/SB/SB-CommercialBuildingsXProductE.html>. For more information, contact Laurence J. Swaziek, S&B Structural Program Manager, 608-267-7701, Lswaziek@commerce.state.wi.us.

Delegated Agents

Some municipalities in Wisconsin have authority to do building or fire prevention plan review, inspections, and otherwise carry out code-related functions as delegates of the Department of Commerce. For information and a list of current delegated municipalities, see the S&B WebSite, www.commerce.state.wi.us/SB/SB-CommercialBuildingsCertifiedMunicipalities.html.

Specific standards define graywater reuse

On May 1, 2003, a new Plumbing Code section, Comm 82.70, will become effective, allowing graywater to be reused in plumbing systems. Specific water quality standards for various reuses have been defined and are in the new Comm Table 82.70-1.

Graywater is wastewater contaminated by waste materials, exclusive of urine, feces or industrial waste, deposited into plumbing drain systems.

Blackwater may not be reused. Blackwater is wastewater contaminated by human body waste, toilet paper, and any other material intended to be deposited in a receptor designed to receive urine or feces.

For graywater to be acceptable for a given end use, the water must meet "Plumbing Treatment Standards" displayed in Comm Table 82.70-1.

A copy of that table and additional information is available in the S&B WebSite Library, <http://www.commerce.state.wi.us/SB/SB-LibraryIndex.html>. Paper copies are also available from Todd Taylor, S&B Publications Editor, 608-267-3606, ttaylor@commerce.state.wi.us.

If you wish to receive a monthly email notifying you when the WCCR is placed on the S&B WebSite, send your email address and name to Todd Taylor, ttaylor@commerce.state.wi.us. In May, there should be a spot to sign up for the email list, on the division's HomePage, <http://www.commerce.state.wi.us/SB/SB-HomePage.html>.

Stormwater Design Continuing Education

In the **Stormwater System Design** class, the instructors will lead the student through small site design problems to size piping, detention, and infiltration systems. The in-depth class will prepare the student to submit plans to S&B and to design systems to comply with stormwater management requirements. Bring a calculator and engineers scale.

Check the class you wish to attend.

Deciding which are the 16 fixtures needed for plumbing plan review

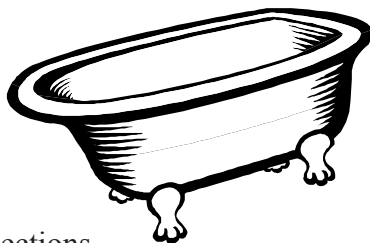

by Dan Kraft, S&B Plumbing Plan Reviewer,
dkraft@commerce.state.wi.us, 608-266-8075

Comm Tables 82.20-1 and 2 describe which types of plumbing plans need to be submitted for review. Both tables refer to “Plumbing, new installations, additions, and alterations involving 16 or more plumbing fixtures...”

What are some examples of fixtures that are counted among the 16?

First, all fixtures described in Tables 82.30-1 and 82.40-1 would be included in this count.

Additional types of plumbing fixtures/appliances/appurtenances are noted in the list on the right. (For example purposes, I have included some fixtures from the above-mentioned tables.)

Many fixtures require both water and drain connections. Those connections are considered part of one fixture. The same would be true if the fixture has an indirect connection, such as a clothes washer.

For example, four clothes washers are installed and discharge into a four-inch receptor; there would be a total of four fixtures for plan submittal purposes.

Another example is if a separate bar sink, ice compartment, and beer tap were installed, all discharging to one receptor. The total number of fixtures is three.

A combination fixture with four compartments is considered one fixture. However, four single sinks installed in a countertop are considered four fixtures.

Two lavs in a molded counter top are considered two fixtures, while a full circle wash fountain is viewed as one.

If you have a question on what is considered a plumbing fixture for plan review purposes, contact any plumbing plan reviewer listed on page 10 of this *WCCR*.

Type	Is it one of the 16?
Car wash interceptor	Yes*
Catch Basin	Yes*
Clothes washing machine	Yes
Dishwashing machine	Yes
Elevator sump crock	Yes, when acting as the drain
Exterior grease interceptor	No*
Hot water storage tank	No
Hub drain discharging to FD tailpiece ...	No
Hub drain serving food prep sink	No
Ice machine	Yes
Interior grease interceptor	No*
Iron treatment device	No
Receptor of clear water waste	Yes
Restaurant water hook-ups (juice machines, soda machines, coffee machines etc.)	Yes
Roof drain	Yes
RP valve	No*
Sanitary dump station	Yes*
Sanitary sump crock	No
Three compartment food prep sink	Yes
Wall hydrant	Yes
Water heater	Yes
Water softener	No
Yard hydrant	Yes

* Always need plan review prior to installation regardless of number of fixtures involved.
